

Softell Textile

Softell PP Compounds with a “Textile Fabric Appearance” provide a new innovative solution for interior automotive applications. A single substrate with the aesthetics, haptics, and performance of a textile fabric-wrapped component.

Softell Textile - Application Examples

- Process Simplification: Delivers a colored fabric-like appearance in the injection molded part
- Superior part appearance and soft touch haptics
- Very low gloss and excellent scratch resistance
- Outstanding mechanical property profile comparable to base materials without textile effect
- Typical Applications: Upper Pillar Trim and other Interior Components
- Product Portfolio: *Softell* TKG 2039N
